RE: Amendment to 0 School St. Batten Malden Solar Project

RECEIVED

OCT 18 2018

Town of Webster  
Planning Department

---

Nexamp requested an Amendment to their Solar Project because Army Corps of Engineers had indicated a strong preference for a swale instead of the covered pipe. The Conservation Commission approved the swale. The Commission would like to see the sides of the swale allowed to be returned to trees over time. The bottom of the swale will need to be maintained at some level, either mowing or pulling out saplings whatever is needed to maintain the flow. Commission approval is contingent upon a satisfactory maintenance plan for the swale and the legal agreement between the town and Nexamp for the work to be done.
