Town of Webster  
Health Department

**WELL CONSTRUCTION REQUIREMENTS**

The Well Driller and applicant are responsible for installing the well in accordance with the Town of Webster's Well Regulations dated October 1, 2007 and according to the approved engineered plan indicating the exact location of the proposed well installation.

If there are not sufficient controls on the property and plan for well drillers to accurately locate the approved location of the well of a professional engineer or registered land surveyor shall stake the well location prior to commencement of drilling the well.

After installation of the well the design engineer shall certify that the well was installed in accordance with the approved plan. An As-Built plan of the well location within legal boundaries of the subject property shall be submitted to the Health Department office along with the well driller's information. If there are any deviations from the plan the design engineer shall state in writing specifically what the deviation is and why. The design engineer shall state that the installed well location meets all required setback distances to the property lines, public roadways, rights of way and water courses.

**WELL COMPLETION REPORT – PUMP TEST**

Once installation of well is completed, a copy of the state form must be submitted to the Health Department by the well driller for review. The pump test shall demonstrate compliance with the required gallons pumped in the number of hours required in the Town of Webster Well Regulations. Once reviewed, the Health Department will notify the property owner if installed well is acceptable or if modifications to the water supply will need to be addressed.

**WATER QUALITY REPORT**

The water quality report shall state the name of the person regularly employed from the state certified laboratory who performed the water sampling tests. Samples shall not be taken by the applicant or land-owner. The sample shall be collected from the pump discharge. The water quality test is listed in the Town of Webster Well Regulations.
