

VACCINATING THE WEBSTER COMMUNITY TO STOP COVID-19

**150 YEARS**  
OF ADVANCING  
**PUBLIC**  
**HEALTH**

Webster Public Schools will be hosting a FREE COVID-19 vaccination clinic run by the Massachusetts Department of Public Health. This vaccination clinic is open to any community member as well as any Webster Schools student and staff.

In order for children between the ages of 12 and 18 to receive the vaccine without a parent/guardian present, parents/guardians must fill out a consent and screening form and send them to school with their student that day. Consent and screening forms can be found on our website.
